PROFESSIONAL SUMMARY

Senior Full Stack Laravel Developer with 4 years of production experience across FinTech, e-commerce, and content-subscription platforms. Currently engineering backend services for Manhom, a subscription platform within Majarra's Arabic publishing network (Harvard Business Review Arabia, MIT Technology Review Arabia), serving 2M+ subscribers across MENA. Previously led backend architecture at Mexbot across four shipped applications, owning service-layer design and CI/CD. Works across Laravel, Neo4j, Redis, and Stripe-based payment infrastructure.

TECHNICAL SKILLS

Core Backend: Laravel (Advanced), PHP 8.2+, RESTful API Design, SQL Optimization

Architecture: Microservices, Repository + Service Layer, DTOs, Strategy Pattern, Event-Driven Design

Data & Cache: MySQL, Redis (Queues & Caching), Neo4j (Graph Database), Database Transactions

DevOps & Infra: Docker, CI/CD, Linux VPS Administration, Supervisor

Integrations: Stripe & Stripe Identity, Pusher (WebSockets), Firebase Cloud Messaging, EmailOctopus, Twilio

Tools: Git, Postman, Composer, Jira

PROFESSIONAL EXPERIENCE

Senior Full Stack Laravel Developer

Feb 2026 – Present

Majarra (manhom.com) · Remote, Saudi Arabia

- Engineer backend services for Manhom, a Majarra subscription platform (HBR Arabia, MIT Tech Review Arabia) serving 2M+ subscribers across MENA.
- Own the subscription and access-management layer — SSO across licensed publications, Stripe Identity verification, and onboarding for a multilingual audience.
- Optimize content-delivery performance by moving non-critical writes (e.g. visitor logging to Elasticsearch) out of the request path, reducing TTFB.

Backend Team Lead

Jun 2023 – Jan 2026

Mexbot (mexbot.net) · Remote

- Led backend engineering across four shipped apps (Rebhak Akid, TeleBac, TeleBrevet, Fast Comand) — owned architecture, code review standards, DTO-based service layers, and CI/CD.
- Built Rebhak Akid's backend (App Store · Google Play): real-time Pusher contest engine, dual-currency wallet with charge idempotency, referral rewards, RBAC, and FCM push.
- Engineered Fast Comand's server-side crawling engine (Amazon, Noon, Temu, Shein) for real-time pricing, backed by a double-entry ledger and geospatial shipping-zone logic.
- Delivered TeleBac and TeleBrevet on a shared API-first architecture, securing video content via AWS S3 signed URLs.

Full Stack Developer

Oct 2022 – Apr 2023

Muzoon · Remote, UAE

- Built a complete e-commerce solution: Blade/Livewire admin panel with a React storefront, and order state machines covering shipping, returns, and refunds.

Practical Training — Laravel Development

Jul 2022 – Dec 2022

XCORE Corporation · Syria

- Structured, production-oriented training in Laravel, SOLID principles, and clean architecture.

PROJECTS

[Rebhak Akid](#) (App Store · [Google Play](#)) · [Fast Comand](#) · [TeleBac](#) · [TeleBrevet](#) · [Manhom](#)
